Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18, 19, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al. (United States Patent 5,797,098), hereinafter referenced as Schroeder.

Regarding claim 18, Schroeder discloses a user interface for cellular telephone. In addition, Schroeder discloses a method of entering alphabet characters having representative characters and succeeding characters to be input from a keypad, wherein a plurality of alphabet characters are classified into some groups and each group includes a representative character, each group is assigned to a corresponding button, and one or more succession controls for inputting succeeding character is assigned to a corresponding button, the method comprising: (a) sensing the selection of a first button; (b) determining whether selection of a second button where the succession control is assigned is sensed after the selection of the first button; and (c) recognizing the representative character assigned to the first button if the selection of the second button is not sensed and recognizing a specific succeeding character associated with representative character responsive to the selection of the second

button if the selection of the second button is sensed, as disclosed at column 4, line 21 through column 7, line 54.

Regarding claims 19 and 31, they are interpreted and thus rejected for the reasons set forth above in the rejection of claim 18.

Allowable Subject Matter

The indicated allowability of claims 18, 19, and 31 is withdrawn in view of the newly discovered reference(s) to Schroeder. Rejections based on the newly cited reference(s) above.

Claims 1 and 4 are allowed.
